
%Æ Never Miss a Lead Again

Every time someone fills out your contact form, their information is instantly saved and organized in one place — no more digging through emails or spreadsheets. You'll know exactly who reached out, when, and what they're looking for.

%Æ Instant Email Alerts

The moment a new lead comes in, you get an email with everything you need: their name, phone number, what service they want, and any message they left. Reply fast, close more jobs.

%Æ See Your Full Pipeline at a Glance

Track every lead from first contact to closed deal. Move leads through simple stages — New !' Contacted !' Booked !' Won — so you always know where each person stands and what needs attention today.

%Æ Know What Your Pipeline Is Worth

See the total dollar value of your open leads at any moment. Know how much revenue you've won this month, how much is still in the works, and how much recurring monthly revenue you've locked in.

%Æ Built-In Follow-Up Reminders

The dashboard flags leads you haven't contacted yet or haven't spoken to recently. No one slips through the cracks just because things got busy.

%Æ Keep Notes on Every Lead

Add internal notes to any lead — what you discussed, what they're looking for, when to call back. Everything stays attached to that person forever.

%Æ Simple Dashboard Numbers

One screen shows you: total leads, how many are new, how many are booked, how many you've won, and how many you've lost. No complicated reports — just the numbers that matter.

%Æ Search and Filter Your Leads

Need to find a specific customer? Search by name. Want to see only your booked appointments? Filter by status. Want to see leads from last month? Filter by date. Done in seconds.

%Æ Visual Pipeline Board

Prefer to see your pipeline as a board? Switch to the card view and drag leads from column to column as their status changes — just like moving sticky notes on a whiteboard.

%Æ Works With Your Existing Website

A small snippet of code goes on your website's contact page. That's it. Leads flow in automatically — no manual data entry, no copy-paste from emails.

%Æ Your Data, Only Yours

You only ever see your own leads and your own numbers. Nothing is shared across businesses. Your information stays private and secure.
